

Consorcio Eólico is the main developer of wind projects in southern Chile.

Based in Concepción, Consorcio Eólico is part of Grupo EO. More than 70 collaborators work from the beginning of the project until its construction with the same philosophy: to develop cleaner energies that contribute to a global sustainable growth.

OUR Company
About as

So far, we have been responsible for the development of over US\$550 million in renewable projects. We want to be a fundamental pillar in the change to a more sustainable energy matrix for Chile.

We estimate that for the next 5 years we will have contributed to the development and construction of projects for more than 2.000 MW in wind power.

OUR Philosophy

Juan Pablo Young Ch.

Mechanical Civil Engineer
EXECUTIVE DIRECTOR

Founding Partner of Inversiones Bosquemar, Consorcio Eólico. More than 10 years of experience in the management and development of renewable energy projects. 6 projects with RCA 730MW.

Jorge Lesser G-H.

Industrial civil engineer
DIRECTOR

Former Finance Manager, International Division Manager, Sub General Manager of Endesa from 1990 to 1999. Currently Director of Companies: Essbío, Saesa, Esva, Andescan, Euroamérica, Embonor.

Juan José Eyzaguirre L.

Attorney at law
DIRECTOR

Former Chief of Environmental Services Arcadis Geotécnica. Director of the Magister of environment. Professor of Environmental Law of the U.de Chile. Regular columnist of the Diario Financiero in environmental matters.

Christian Evans R.

Pubic Accountant
GENERAL MANAGER

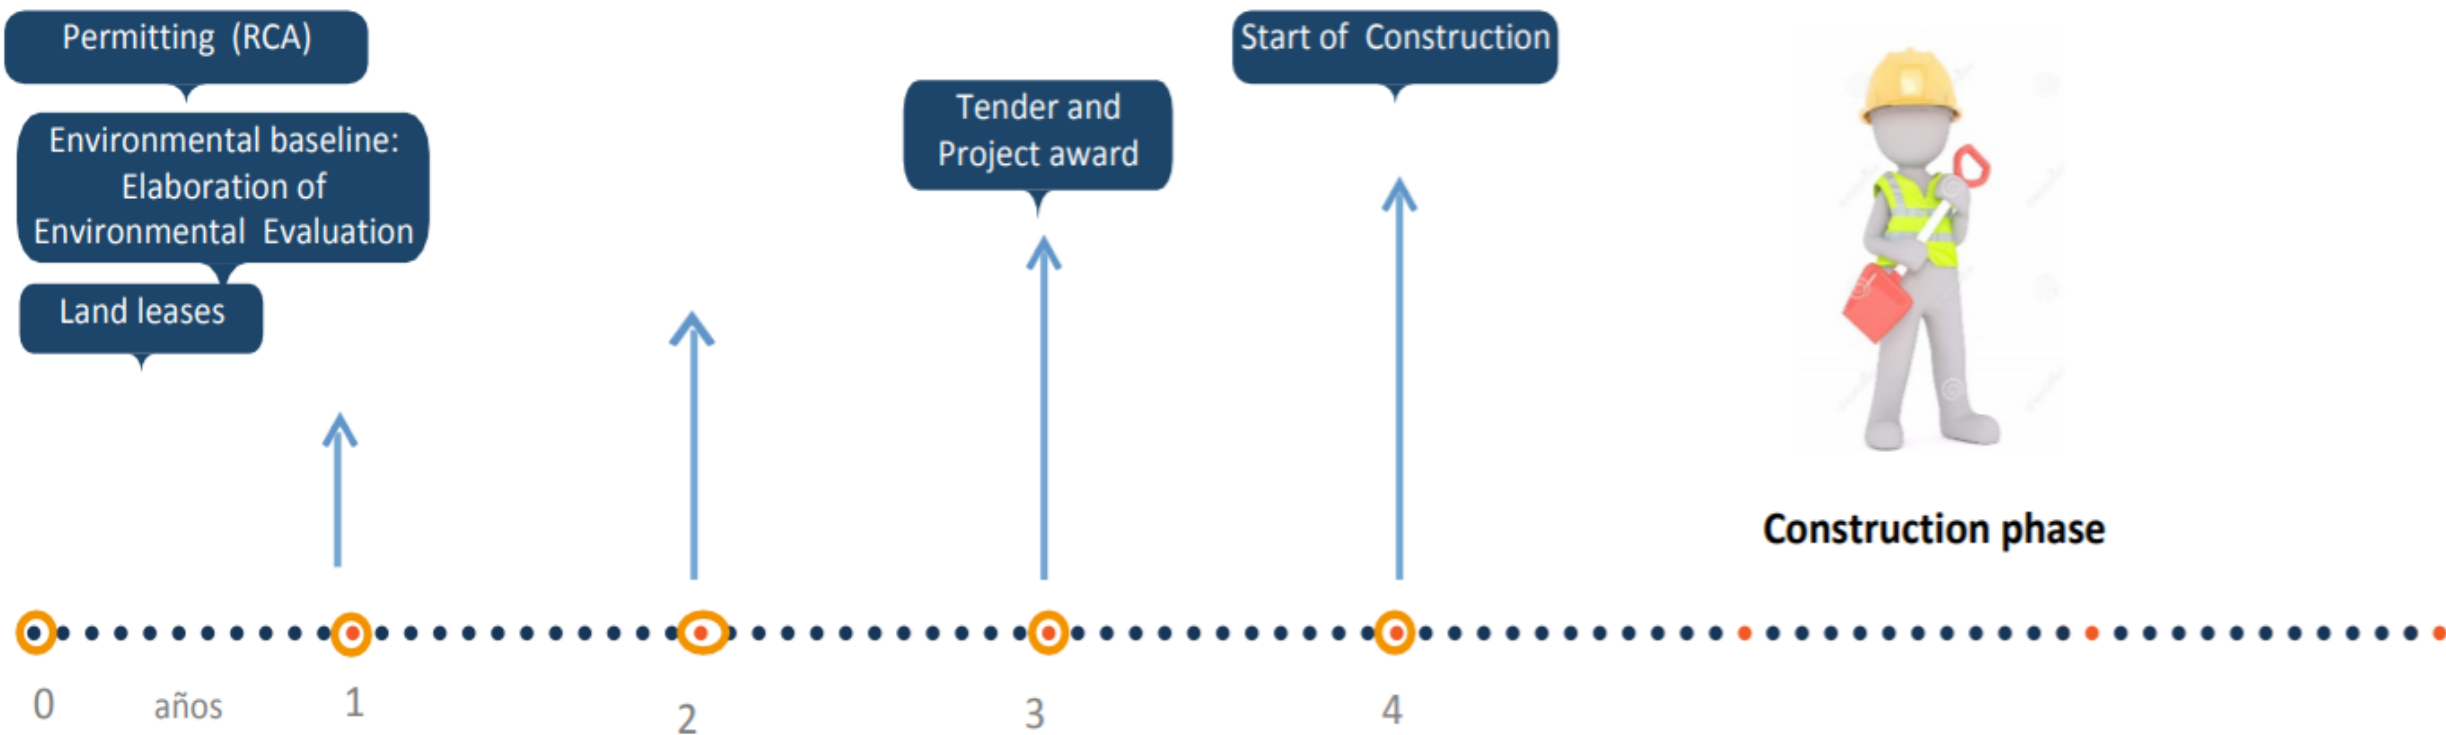

Former General Manager Telex Chile Internacional. Former General Manager of Kapital Real Estate. Former Shareholder, Director and Country Manager Mainstream RP, where he had direct responsibility for the development of a 2,500MW portfolio of solar and wind projects in Chile.

Consorcio Eólico aims to find suitable land to develop wind farms, go through the whole development process and find suitable companies that will own, build and operate them.
